Call for Papers

Data Science stands at the forefront of new scientific discoveries. It plays a significant role in all aspects of our daily lives. The 10th IEEE Swiss Conference on Data Science brings together researchers, developers and innovators. SDS2023 takes place on June 22-23, 2023.

Topics of interest
We invite international submissions of original research papers related to all areas of Data Science, especially best practice and use-case oriented research work with scientific-technical depth and practical applicability. Topics include but are not limited to the following areas:

- Data Product Design, Data-Centric Business Models
- Business Intelligence
- Data, Text, and Web Analytics
- Machine Translation & Multilinguality
- Question Answering and NLP Applications
- Data Warehousing
- Decision Support Systems
- Information Integration
- Search & Information Retrieval
- Semi-Structured and Unstructured Data
- Data Governance
- Data Fusion
- Pattern Recognition
- Recommendation Systems
- Personalization and Contextualization
- Predictive Modelling
- Abnormal Detection, Adversarial Attacks
- & Robustness
- Support Vector Machines
- Data Mining
- Classification, Clustering, Object Detection and Semantic Segmentation
- Un-, Semi- and weakly Supervised Learning
- Deep Learning
- Machine Learning
- Evolutionary Computing and Optimization
- Feature Selection
- Fuzzy Computing
- Hybrid Methods
- Neural Networks and their Applications
- Data Management
- Modelling and Managing Large Data Systems
- Open Data
- Data and Information Quality
- Data Modeling and Visualization
- Data Structures and Data Management Algorithms
- Big Data Applications
- Edge Computing
- Query Processing and Optimization
- Data Privacy and Security
- Fairness, Accountability, Transparency, Ethics, and Explainability
- Cyber security in relation to data science
- Domain Specific Applications (e.g. Health, Legal, Industrial, Environmental etc.)
- smart services
- data-driven value creation
- data-driven servitization
- circular servitization
- data-driven service ecosystems

Submission
- Full Paper – present high-quality research contributions, including experiments, analysis, or system papers, as well as descriptions of application results. Each submission can have up to 8 pages incl. references.
- Short Paper – present late-breaking results, work in progress, follow-up extensions, application case studies, or evaluations of existing methods. Each submission can have up to 4 pages incl. references.

All submissions must be original works that have not been published previously in any conference proceedings, magazine, journal, or edited book. The review process will be double blind, therefore we ask authors to take specific care to anonymize their submissions reasonably. Concurrent submissions are strictly forbidden. Submission of papers implies the intention to register and present the related content at the conference. The scientific international Program Committee will carefully review the submissions. Excellent content and presentation as demonstrated in the submission are mandatory for acceptance (acceptance rate 2022: 29%). Accepted submissions will be presented in English (as a talk or a poster) by the authors at the conference. As last year, proceedings of all papers presented at the conference will be submitted for inclusion in the IEEE Xplore digital library. All submissions must be formatted by following the IEEE 8.5” x 11” two-column format.
